ENERGY EFFICIENCY **EXPERTS**

YOUR COMFORT PARTNER

As a Quebec-based company, we're constantly pushing the technical and aesthetic boundaries surrounding the design and manufacture of windows and doors. We achieve this by investing in research and development, allowing us to offer innovative, high-performance and durable products, perfectly suited to our harsh climate. We also achieve this through the keen attention to detail and commitment of our team, whose members are totally dedicated to your satisfaction.

Our commitment to excellence, from design to installation, is matched only by our pride in offering the best products on the market.

PEACE OF MIND GUARANTEED

ENERGY STAR and NFRC certified, Artik windows and doors meet the highest quality standards and offer some of the best energy performance in the industry. Furthermore, they come with noteworthy guarantees. In fact, when you choose Artik, you benefit not only from optimum comfort, but also from total peace of mind.

TIME FOR HIGH PERFORMANCE

High performance in every regard, the products in the Artik series stand out for their resolutely modern design and robust construction in white PVC-U vinyl. This extremely robust material offers exceptional performance, excellent energy efficiency and enhanced durability.

Artik series windows and doors also feature the Swisspacer-brand spacer system, made from a highly insulating fibreglass-reinforced composite material. Thanks to the Swisspacer's superior insulating performance, the glass remains at higher temperatures and cold radiation is decreased, considerably reducing the risk of condensation and mould.

Energy-efficient double or triple glazing on Artik Series windows and doors protects your home from the rigours of our climate, while multiple weatherstrips ensure exceptional sealing against air, water and wind. In addition, the top-of-the-range hardware system helps optimize durability and performance (stainless steel optional). Finally, fusion-welded corners and a multi-chamber structure ensure superior thermal and acoustic performance.

In a nutshell, these are doors and windows of unparalleled quality, offering outstanding energy performance that you'll enjoy every day... for decades to come!

VARIOUS OPTIONS FOR A PERFECT INTERIOR FINISH

To ensure a perfect finish, you can choose between PVC-coated finger-jointed pine, all PVC-U or select pine build-out. You can also select from an unlimited choice of interior paint colours (for certain models). The PVC-U casing and trim add the finishing touch.

EXTERIOR FINISH

You can choose from ten models of brickmould or bevel mouldings. We offer you all the flexibility you need for every design, thanks to our vast selection of grids, muntin bars and integrated false mullions in a variety of styles and colours. Finally, you'll be spoiled for choice when it comes to selecting exterior paint from an unlimited palette of colours.

SPECIAL ORDERS

Need architectural windows with geometric shapes or special dimensions? Or custom-built bay windows? Looking for a window built from scratch to match the style of your home? We can manufacture Artik windows according to your exact specifications.

ARTIK SERIES

ENERGY EFFICIENCY AND DURABILITY

From the choice of materials to the manufacturing process, we've gone to great lengths to optimize the energy efficiency and durability of Artik series windows and doors, making them ideal for our harsh climate.

We're now proud to offer you the most energy-efficient and durable windows and doors available.

PERFORMANCE

The performance of windows and doors is essential in our climate. We know this, and we've done everything we can to optimize the energy efficiency of our products.

AFFORDABLE

Artik doors and windows are available at prices to suit all budgets.

INNOVATION

The result of research and innovation, our doors and windows represent the very best in the market.
